

# Green Fingers

## Creative Teambuilding

**Team Focus:** Creativity  
Communication  
Collaboration

**Numbers:** 5 - 50

**Location:** Outdoors

**Times:** ½ day – full day

### The Objectives:

- Create one team
- Give something back to the community

*“This is about giving something back to the community. Your teams will be amazed at what they have achieved in so little time and also at what they have created for others to enjoy.”*

### Overview:

This is a fun and hands on activity involving the whole team. With the help of a landscape gardener, some sketch pads and a selection of herbs, plants and garden equipment it is your task to design and create your very own allotment!

### How it works:

The Green Fingers activity can be held in local schools, church gardens, nursing / care homes and communal gardens, allowing the finished gardens to be shared and looked after by the local community.

Your group will be separated into teams and allocated a team pack including money, sketch pads, design ideas along with other gardening apparel. They will then be allocated a certain amount of time in which the garden is to be designed, products for the garden are to be purchased and the garden is to be transformed.

### Results:

As the event has many different aspects there will be a task for everyone creating a 'one team' feeling throughout the day. Teams will also feel a great sense of achievement through out the day and when looking at the end result.

### Programme Includes:

- Event Manager
- Experience instructors and facilitators
- Team kits & equipment
- £2 Million Public Liability
- Plants
- Gardening equipment
- Transport & Mileage
